

Visual Arts

Visual Arts also offers Certificates in Applied Science. Each certificate includes eleven courses of study emphasizing advanced training for each area, but these certificates do not require humanities/social sciences/math courses included in the Associate in Arts degree. Students may pursue both the Associate in Arts degree and one or more of the certificates. Students entering these programs typically have a strong interest in art, but usually have very little or no formal training. Students build both their confidence and their portfolios while participating in rigorous problem-solving and conceptual assignments. Successful graduates of the programs are assured of having the necessary skills for a wide range of career opportunities in visual arts related professions. We do not train students to become simply the technicians or implementers of technology, instead our teaching and learning process facilitates students' understanding of education being a lifelong development.

Certificates in Applied Science

Fine Arts

ARV	121	Design	3.0
ARV	110	Computer Graphics I	3.0
ART	111	Basic Drawing I	3.0
