Are you interested in a career in the auto industry? Would you like to learn the latest automotive systems using up-to-the-minute technology in an active, hands-on program? Then check out Automotive Technology at Greenville Technical College where you'll find a level of training that's well-respected by area employers.

With extensive electronic and computerized circuitry, late model automobiles are highly complex machines. Automotive technicians must be skilled in using modern test equipment, special tools, emission controls, overdrive transmission, and other test equipment.

Our Automotive Department is located at the McKinney Regional Automotive Technology Center. Approximately one mile from the Barton Campus, this facility includes 19 multimedia classrooms, computer labs and offices, and the equipment and tools needed to give graduates industry-ready skills.

What You'll Learn

Through a combination of lectures and hands-on instruction, you'll learn

- Engine fundamentals
- Automotive electricity
- Manual drive train/axle
- Brakes
- Engine reconditioning
- Ignition systems
- Fuel systems
- Suspension & steering
- Automatic transmission
- Automotive air conditioning

Graduates are encouraged to take the Automotive Service Excellence (ASE) test to gain certification as an Automotive Service Excellence Technician.

Program Award

- Automotive Service Training Program Associate Degree
