Power up your career and fill one of the many positions waiting in the diesel industry.

The job outlook for diesel mechanics is strong, with employment expected to grow by 9 percent over the next decade. According to the Bureau of Labor Statistics, job opportunities should be best for those who have completed postsecondary education.

A stable and growing industry means jobs for graduates. The job placement rate for the Diesel programs at Greenville Technical College is 80-100 percent, with graduates working in fields such as fleet maintenance, power generation, marine repair and truck dealerships.

Hands-on experience is an important part of the program and, combined with classroom instruction, gives you the solid service and repair skills you’ll need to make an easy transition to the workplace.

You’ll learn

- Diesel engines
- Diesel equipment service and diagnosis
- Diesel fuel systems
- Power trains
- Suspension and steering
- Air brake systems
- Electrical systems
- Hydraulics Systems

Many students earn while they learn and have the opportunity to team up with local businesses, providing valuable hands-on experiences and applications in the workplace environment.

Visit www.gvltec.edu/gainful-employment for important information about the educational debt, earnings, and graduation rates of students who attended this program.

Program Options

- Diesel Equipment Technology Certificate
- Diesel Engine Performance Certificate
- Heavy Equipment Auxiliary Systems

Greenville Technical College provides equal opportunity and affirmative action in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, sexual orientation, or veteran status.
