NOTICE OF INTENT TO SOLE SOURCE

Intent:

Greenville Technical College seeks to procure One CDS-250 Clinical Driving Simulator from DriveSafety as a sole source procurement under the provisions of Section 11-35-1560 of the South Carolina Code Of Laws and Section 19-445-2105 of the South Carolina Code of Regulations.

Determination:

DriveSafety is the sole distributor of the CDS-250 Driving Simulator and they have no outside distributors or representatives in the United States.

The CDS-250 is necessary for the distinct collaboration opportunity with Clemson University to develop skills of Greenville Technical College's Occupational Therapy Assistant students and alumni to increase availability of intervention for persons within the Greenville, SC community.

DriveSafety is the only developer and distributor of the simulator.

The simulator is unique for the following reasons:

- Compatibility with Clemson University Simulator
- Actual Ford Focus automotive components (dash with instrument cluster, steering column, shifter, radio with CD/MP3/USB Port, working fan).
- Bariatric seat with electric lift.
- Reduced Immersion Display System:
 - Enlarged rendered Field of View (FOV), 110 degrees in just 70 actual degrees
 - 19" displays for optimal patient comfort and ease of adaptation
 - Adjustable eye relief distance for optimal viewing distance for patient comfort and ease of adaptation
- Licensed DriveSafety proprietary software
 - Vection Runtime Software
 - CDS Control Management Software
 - SimClinic Clinical Scenario Software
 - Simulator Adaptation Protocol
- Transfer Frame for wheelchair patients (stowable)
- Integrated left-foot accelerator pedal (stowable)
- The system is 33" wide and can pass through a standard commercial door. It is also on locking wheels so it can be easily moved.

The college has therefore determined that DriveSafety is the only source for this driving simulator technology, and seeks to enter into a contract under a sole source determination.

Company Specifics:

DriveSafety
